WORK EXPERIENCE

Arizona State University

Aug 2025 – Present

Software Engineering TA

- Conducted technical code reviews for 300+ Java/Spring Boot projects weekly, evaluating REST API design, JUnit testing coverage, MySQL schema optimization, and MVC architecture patterns.
- Mentored 150+ students on REST API design patterns, database normalization, and version control workflows, improving code quality scores by 30% through one-on-one technical guidance.

LEIFII

Jan 2024 – June 2024

Software Engineer Intern

- Built full-stack web application for HR management using React, Node.js, Express, and MongoDB, streamlining workflows for 200+ employees and reducing manual effort by 40%.
- Designed responsive UI with Tailwind CSS and reusable React components using Context API, improving page load speed by 25% and ensuring consistency across 5+ modules.
- Integrated secure REST APIs with JWT authentication and RBAC using Express middleware, optimizing MongoDB aggregation pipelines to reduce query latency by 30%.

Softanic Solutions

July 2023 – Dec 2023

Software Developer Intern

- Developed REST APIs using Spring Boot for IT helpdesk system handling 1,000+ monthly tickets, improving support efficiency by 25% through intelligent routing and escalation workflows.
- Optimized MySQL database schemas and implemented indexed queries, reducing query response time by 30% and enabling real-time dashboard analytics.

PROJECTS

Student Loan Retirement Match Platform | github.com/ShivamGS/loan-platform

- Architected serverless fintech platform using Python, AWS CDK, Lambda, and DynamoDB, enabling ASU employees to calculate SECURE 2.0 retirement benefits through event-driven processing and real-time dashboards.
- Engineered automated eligibility pipeline using AWS Lambda and DynamoDB streams, processing user loan data and reducing manual computation time by **35%**.
- Developed AI-powered chatbot using LangChain and **Claude API** via WebSocket connections, delivering personalized retirement insights with **<2s response time**.

Collaborative Document Editor | github.com/ShivamGS/collab-editor

- Built real-time collaborative editor using React, Node.js with JavaScript with Yjs CRDTs and WebSockets supporting **100+ concurrent users** with conflict-free synchronization.
- Implemented JWT authentication, role-based access control, and live presence features (autosave, typing indicators) ensuring **<100ms** sync latency across distributed sessions.

Fake Content Detection System | github.com/ShivamGS/fake-detection

- Created full-stack AI platform detecting fake text/images using Flask APIs, React dashboard, and hybrid ML models (XGBoost, RoBERTa, CNN) achieving **93% accuracy**.
- Integrated fact-checking APIs and implemented feedback-based model retraining, enabling real-time credibility scoring and continuous improvement across multilingual datasets.

EDUCATION

Arizona State University | *MS in Computer Science* | *GPA: 3.9*

Aug 2024 – May 2026

Savitribai Phule Pune University | *BS in Information Technology* | *GPA: 3.88*

Aug 2020 – May 2024

KEY SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React, Next.js, TailwindCSS, HTML5, CSS3

Backend: Node.js, Express, Spring Boot, Flask, REST APIs, GraphQL, WebSockets

Databases: MongoDB, PostgreSQL, DynamoDB

Cloud & DevOps: AWS (Lambda, S3, API Gateway), Git, Docker

AI & ML: LangChain, Claude API, OpenAI API, FAISS

ACHIEVEMENTS

- Published research paper "Anime Face Generation using DC-GANs" in AIP Conference Proceedings (Dec 2023).
- Winner of 3 hackathons: TIAA x ASU Spark Challenge 2025, Pune Smart Health Hackathon, TIAA Intercollege 2023.
